RE: California Public Records Act Request — Encroachment Permits and Right-of-Way Authorization
Records for Flock Safety Camera Installations

Pursuant to the California Public Records Act (CPRA), Government Code §7920 et seq., I hereby request access to and copies of the following public records held by Yuba County Public Works relating to the physical installation and right-of-way authorization of Flock Safety automated license plate reader (ALPR) camera equipment within Yuba County.

This request is informed by the Memorandum of Understanding dated June 17, 2025, between the Yuba County Sheriff's Department and Yuba County Public Works (the "Public Works MOU"), which authorizes installation of Flock Safety camera hardware at the Starbend Boat Ramp Area. The Public Works MOU references additional implementation costs "including but not limited to hardware, network infrastructure, [and] maintenance" (Section 5.4) and places responsibility for such costs on Public Works, suggesting Public Works has or should have documentation of the physical installation process. This request also covers any additional Flock Safety camera installations on county-maintained roads, rights-of-way, or public property beyond the Starbend location.

RECORDS REQUESTED

Category 1 — Encroachment Permits

1a. Any encroachment permit(s) issued by Yuba County Public Works, Caltrans, or any other permitting authority authorizing the placement of Flock Safety camera hardware within a county road right-of-way, public easement, or other public right-of-way, for any installation location within Yuba County.

- 1b. Any encroachment permit applications submitted in connection with Flock Safety camera installations, whether approved, denied, pending, or withdrawn.
- 1c. Any traffic control plans, engineering reviews, or safety assessments submitted or required in connection with any encroachment permit application for Flock Safety camera hardware.
- 1d. Any communications between Yuba County Public Works and the Yuba County Sheriff's Office, Flock Safety, or any contractor regarding encroachment permit requirements for camera installations.

Category 2 — Site Authorization and Installation Records

- 2a. Any records identifying the specific installation locations (addresses, GPS coordinates, or pole/fixture identifiers) of all Flock Safety cameras installed within Yuba County on county-maintained roads or public rights-of-way.
- 2b. Any license agreements, pole attachment agreements, or right-of-way use agreements between Yuba County (or any county department) and Flock Safety or any utility or infrastructure owner regarding camera mounting locations.
- 2c. Any records documenting the permittee of record for each Flock Safety camera installation within a public right-of-way (i.e., whether the permit was issued to Yuba County, the Sheriff's Office, Flock Safety, or a third-party contractor).
- 2d. Any inspection records, completion certificates, or sign-off documentation related to Flock Safety camera hardware installations.

Category 3 — Negative Records Certification

- 3a. If no encroachment permit was obtained for any Flock Safety camera installation within a county road right-of-way, please provide a written statement to that effect, identifying which installation locations, if any, were determined not to require a permit and the basis for that determination.

SCOPE AND LIMITATIONS

This request covers all Flock Safety camera installations within Yuba County on or adjacent to county-maintained roads, public rights-of-way, or public property, including but not limited to installations in the Plumas Lake area and the Starbend Boat Ramp Area. It encompasses installations funded through any source, including the Measure K sales tax fund, JAG grant award funds, Public Works reimbursement under the June 2025 MOU, or direct county appropriation.

This request does not seek law enforcement investigative records, individual plate read data, search query logs, or records exempt under Gov. Code §7923.600. It is limited to infrastructure permitting and right-of-way documentation, which are administrative records not subject to law enforcement exemptions.

PREFERRED FORMAT

Please provide responsive records in electronic format (PDF or native file format) via email or a secure file transfer link. If any portion of a record is withheld, please provide a written index identifying each withheld record or redaction, the specific exemption claimed, and the factual basis for the exemption as required by Gov. Code §7923.010.

STATUTORY REQUIREMENTS

Under Gov. Code §7922.525, the agency must respond within ten (10) calendar days of receipt, either providing the records, notifying the requestor of the need for a 14-day extension, or stating the grounds for withholding. If you require clarification to identify responsive records, please contact me promptly.

FEE WAIVER REQUEST

I request a waiver of any duplication or processing fees. Disclosure of these records serves the public interest by promoting transparency and accountability in the deployment of surveillance infrastructure on public roads and rights-of-way. These records are not sought for commercial purposes.

Thank you for your prompt attention to this request. Please direct any questions or correspondence to the contact information listed above.

Respectfully submitted,

[Requestor Name]

April 10, 2026

This request is a companion to Phase 1 and Phase 2 CPRA requests directed to the Yuba County Sheriff's Office. It is directed to Yuba County Public Works as the department with primary responsibility for county road right-of-way permitting and as a named party to the June 17, 2025 Memorandum of Understanding authorizing Flock Safety camera installation at the Starbend Boat Ramp Area.
